

One

act of courage

Opioids negatively affect the reward center in the brain. This makes them highly addictive.¹

You can make a difference.
Help a friend. Share the facts.

STOP OPIOID MISUSE Your choices matter

- ✓ If you are prescribed an opioid, talk with your doctor about other options.
- ✓ Nearly half of people misusing pain relievers, including prescription opioids, get them from a friend or family member. Never share an opioid prescription with someone else.²
- ✓ Treatment works. If you think you need help, call Washington Recovery Help Line at 1 (866) 789-1511.
