act of courage

Opioids negatively affect the reward center in the brain. This makes them highly addictive.¹

You can make a difference. Help a friend. Share the facts.

STOP OPIOID MISUSE Your choices matter

If you are prescribed an opioid, talk with your doctor about other options.

Nearly half of people misusing pain relievers, including prescription opioids, get them from a friend or family member. Never share an opioid prescription with someone else.²

Treatment works. If you think you need help, call Washington Recovery Help Line at 1 (866) 789-1511.
